

LONG TERM PAVEMENT PERFORMANCE PROGRAM DIRECTIVE

For The Technical Direction Of The LTPP Program

Program Area: Monitoring

Directive Number: SM-23

Date: July 15, 1997

Supersedes: SMPCheck v2.5b

Subject: Upgrade of SMPCheck Software to Version 2.5c

This new version of the SMPCheck software contains modifications made in response to feedback from the RCOCs. More specifically, the SMPCheck software was modified to correct a problem which prevent users from creating a new mobile EDT file. This modifications do not require changes to the documentation; hence, the Users Guide provided with the SMPCheck v2.5 software remains unchanged.

SMPCheck v2.5c should be installed on all computers being used to enter and process SMP data. Installation consists of copying the file INSTALL.EXE off the distribution diskette and into the SMPCheck directory. Once done, run the INSTALL.EXE program and answer "yes" to overwrite existing program files. If this procedure is followed, the SMPCheck program should be able to read and process all data previously entered and processed with 2.5b or earlier version of the SMPCheck program.

If there are any problems, please submit a SMP problem report (SMPPR) form in accordance with LTPP Monitoring Directive SM-6
